Professional Summary

I am 18 years old and a Computer Science student with a Technical Degree in IT. I have experience in full-stack development, LLM-based solutions, and teamwork. Winner of Hackatime 2024 with the project *Up Connections (Connect Skills)*, presented at Taquara Summit and awarded at the 16th FEINTEC (2025).

Languages

Portuguese: Native

English: Advanced

Skills

- JavaScript, TypeScript
- React, Next.js, Tailwind CSS
- Node.js, Java, Python
- PostgreSQL, MySQL, Firebase
- Prisma ORM
- REST APIs
- n8n and LLMs (Artificial Intelligence)
- Git and GitHub
- Teamwork and Communication
- Problem-solving

Experience

Full-Stack Developer

Solutti Networks LTDA

Full-time (Apr 2026 - Present)

I work on operations automation using n8n and integration with large language models (LLMs). I develop and maintain interactive AI agents, such as an assistant that allows users to request and receive detailed real-time network information and diagnostics. Additionally, I continue working on the development and evolution of web platforms.

Desenvolvedor Full-Stack

Solutti Networks LTDA

Internship (Jan 2026 - Mar 2026)

I started my journey at the company by developing modules for advanced network monitoring and automated DNS/IP blocking for a web platform.

Projects

Connect Skills

Platform that connects candidates and companies based on behavioral skills using artificial intelligence.

Technologies: Next.js, React, Node.js, MySQL, Prisma ORM

Link: <https://github.com/brunowasch/connect-skills-next>

Meetor.ai

Mentorship platform that enables real-time technical evaluation. I developed the full data integration with Connect Skills, ensuring that mentor evaluations automatically update candidate profiles.

Technologies: Next.js, React, Node.js, MySQL, Prisma ORM, APIs

Link: <https://github.com/brunowasch/meetor.ai>

Battleship Game

Java-based game executed directly in the terminal.

Technologies: Java

Link: <https://github.com/brunowasch/java-naval-battle>

Course/Student Management System

System developed to manage a training school database, including student and course registration and enrollments while maintaining data integrity.

Technologies: Java, PostgreSQL

Link: <https://github.com/brunowasch/Sistema-Curso>

WTech

Application that allows searching GitHub users through API consumption.

Technologies: React, APIs

Link: <https://github.com/brunowasch/wtech>

Pet Shop System

Simple pet shop system with features for pet registration, listing, and search.

Technologies: HTML, CSS, JavaScript

Link: <https://github.com/brunowasch/teach3035-petshop>

Education

Bachelor in Computer Science - Universidade Feevale (2026 - Present)

Technical Degree in IT - Escola Técnica Estadual Monteiro Lobato (2023 - 2026)

English Course - Do It English Lessons (2021 - 2024)
